**Subject: Matthiessen and Hegeler Risk Assessment (RA) and Remedial Investigation (RI) Review Due Dates, Matthiessen and Hegeler Zinc Company Site, LaSalle, Illinois**

Dear Reviewers,

This correspondence is being sent out to ensure that everyone reviewing the M&H RA and RI documents has the correct due date for comments to be returned to myself at the U.S. EPA on their calendars. The RA and RI documents were submitted to myself on June 4, 2010 by GeoSyntec and were also respectively mailed out near that time to SulTRAC and Illinois EPA for review. As outlined in their work assignment, SulTRAC has 30 days to complete their review of the documents, so the due date for their submittal is July 9<sup>th</sup> (to allow for transmittal time). As discussed with Illinois EPA, the due date for their submittal is July 30<sup>th</sup>. In-house U.S. EPA reviews should also plan to have their comments finalized by July 30<sup>th</sup>. It is then planned that final comments from the U.S. EPA will be sent to GeoSyntec on August 5<sup>th</sup> for incorporation into the Final RA and RI Reports.

Please plan for these time frames accordingly and if there are any concerns, feel free to contact me at any time.

Sincerely,

Demaree Collier  
Remedial Project Manager  
Superfund Division
